² Since the Singapore fund universe is not domestically focused and invests in a host of regions, currencies, and asset classes, discussion of global macroeconomic trends is imperative to understand fund performance. Furthermore, to avoid confusion from counter-directional currency movements (against the Singapore dollar) in the discussion of market trends, all index/average performance figures in this section are expressed in local-currency or U.S.-dollar terms.

3.2 Bond Markets

The Citigroup WGBI rose 1.55% for the quarter (in USD). The ten-year Treasury yield ended at 2.395% for the first quarter of 2017 versus 2.432% at the end of Q4 2016.

3.3 The Outlook

U.S. President Trump has reversed himself on labeling the Chinese government a currency manipulator. The White House also announced a tax reform plan, including slashing the corporate income tax rate to 15 percent from 35 percent, reducing the number of income tax brackets to three. However, the details of a complete tax proposal are not ready and concrete yet. Investors are concerned that the Trump administration's tax cuts proposal could increase the federal deficit and push up the national debt. It's also a big conflict for a giant fiscal stimulus and tax cut. Moreover, tensions have risen sharply in Korean Peninsula as North Korea has stepped up ballistic missile tests. It's unpredictable how a conflict or crisis could unfold, and the investors should watch out for further international political development.

6 SUMMARY OF RISK-ADJUSTED PERFORMANCE

The Lipper Leader rating methodology consists of four metrics that rate funds' success in meeting certain goals:

- Total Return: Ability of a fund to provide superior total return compared to its peers
- Consistent Return: Ability of a fund to provide relatively superior consistency and risk-adjusted return compared to its peers
- Preservation: Ability of a fund to demonstrate superior preservation of capital in a variety of markets compared with other funds in its asset class
- Expense: Ability of a fund to successfully manage to keep its expenses low relative to its peers and within its load structure

Funds are ranked against their Lipper peer group classifications for a three-year period. In other words, if a fund doesn't have at least three years of historical performance and it is not in a group with more than five funds, it is not rated by Lipper. The rating is based on an equal-weighted average of percentile ranks of the four Lipper Leader metrics.

For each metric:

The top 20% of funds receive a rating of "5" and are named **Lipper Leaders**.

The next 20% of funds receive a rating of "4."

The middle 20% of funds receive a rating of "3."

The next 20% of funds receive a rating of "2."

The lowest 20% of funds receive a rating of "1."

6.1 Lipper Leader Rating for CPFIS-Included Unit Trusts

Source: Thomson Reuters Lipper

As of the end of March 2017 the number of CPFIS-included unit trusts in the top 20% of funds, receiving a rating of "5" and named Lipper Leaders in each metric, was as follows:

■ Total Return: 15 funds

Consistent Return: 14 funds

Preservation: 22 funds

Expense: 4 funds

There's no CPFIS-included unit trust received a rating of "5" (Lipper Leader) in all four metrics.

Lipper Leader Rating Methodology

Unlike many competing quantitative measures, the strength of the Lipper Leader rating system is that it uses investor-centered criteria and not asset- or style/strategy-based criteria. These investor-centered criteria deliver clear, straightforward descriptions of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent, strong returns.

Investor-centered measures of fund performance and suitability

The Lipper Leader rating system consists of four metrics that provide clear, straightforward descriptions of a fund's success in meeting certain goals for constructing individualized portfolios.

- Total Return
- Consistent Return
- Preservation
- Expense

Determine whether you are investing in funds that fit your investment goals

Lipper Leaders provide context and perspective for making informed investment decisions but do not predict future performance. Funds are ranked against their Lipper peer group classifications each month for three-, five-, and ten-year periods and for the overall period. These ratings are based on an equal-weighted average of percentile ranks of the four Lipper Leader metrics.

For each metric:

- The top 20% of funds receive a rating of "5" and are named Lipper Leaders.
- The next 20% of funds receive a rating of "4."
- The middle 20% of funds receive a rating of "3."
- The next 20% of funds receive a rating of "2."
- The lowest 20% of funds receive a rating of "1."

Lipper Leader Metrics

Total Return

The Lipper Leader rating for Total Return denotes a fund that has provided superior total return (income from dividends and interest as well as capital appreciation) compared to a group of similar funds. A Lipper Leader for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors the Total Return rating can be used with the Preservation and/or Consistent Return ratings to make an appropriate selection that balances risk and return.

Expense

The Lipper Leader rating for Expense identifies a fund that has successfully managed to keep its expenses low relative to its peers and within its load structure. A Lipper Leader for Expense may be the best fit for investors who want to minimize their total costs. This measure can be used in conjunction with Total Return or Consistent Return to identify funds with above-average performance and lower-than-average cost.

Consistent Return

The Lipper Leader rating for Consistent Return identifies a fund that has provided relatively superior consistency and risk-adjusted returns compared to a group of similar funds. Funds that achieve high ratings for Consistent Return may be the best fit for investors who value a fund's year-to-year consistency relative to other funds in a particular peer group.

Investors are cautioned that some peer groups are inherently more volatile than others, and even Lipper Leaders for Consistent Return in the most volatile groups may not be well suited to shorter-term goals or less risk-tolerant investors.

Preservation

The Lipper Leader rating for Preservation is for a fund that has demonstrated a superior ability to preserve capital in a variety of markets compared with other funds in its asset class.

Choosing a Lipper Leader for Preservation may help to minimize downside risk relative to other fund choices in the same asset class. Investors are cautioned that equity funds have historically been more volatile than mixed-equity or fixed income funds, and that even a Lipper Leader for Preservation in more volatile asset classes may not be well suited to shorter-term goals or less risk-tolerant investors.

Lipper Global Classification

The Lipper Global Classification (LGC) is the unique fund classification system developed by Lipper to assist fund information users in comparing fund performance within a reasonable peer group. Its purpose is to create homogeneous groups of funds with comparable investment objectives. We refine our existing classifications to ensure meaningful peer groups and add new classifications in response to client requests and market trends.

Quantitative Analysis

Return

All returns are calculated on a NAV-to-NAV basis in Singapore dollars with dividends reinvested. The gain or loss of a particular fund in a particular period is calculated with the following formula:

Performance

$$Percentage \ Growth = \frac{NAV_{t} - NAV_{t-l}}{NAV_{t-l}}$$

For simple return:

Number of Time Units Per Year Performance Annualized = $(1 + Percantage Growth)^{\frac{1}{Number of Time Units in Period}} - 1$

For log returns: Return Relative to Benchmark Time Units Per Year × Percentage Growth

Relative return is a measure of f\(\frac{1}{1}\)He for High cere is a measure of f\(\frac{1}{1}\)High cere is a fixed be for High cere is a fixed by the fixed beautiful to the fixed b as the difference between the fund's return and the benchmark's return over a given period. Higher relative return means better fund performance relative to the benchmark's performance.

```
Formula:
```

```
Relative Return = Fund Return - Benchmark Return
For simple return:
                                                              Number of Time Units Per Year
Relative Return Annualized = (1 + Relative Return) Number of Time Units in Period -1
For log returns:
Relative Return Annualized = \frac{Number of Time Units Per Year}{Number of Time Units Per Year} \times Relative Return
                                    Number of Time Units in Period
```

Expense Ratio

Expense ratio expresses the management, trustee, and certain other expenses of a managed fund as a proportion of the net asset value of the fund. The expense ratio expresses the sum of all operating expenses charged on an ongoing basis to the fund's assets as a percentage of the fund's average net asset value and is calculated using the following formula:

Total Expense Ratio (%) =
$$\frac{\text{Total Operating Expenses}}{\text{Average Net Asset Value}} \times 100$$

Information Ratio

Information ratio is a risk-adjusted measure of a fund's performance relative to its benchmark's performance. (The fund's benchmark can be found in the supplementary document Return Performance Review.) The information ratio is given by the ratio of average relative return (excess return) and tracking error. Tracking error or tracking risk refers to the volatility or standard deviation of the investment manager's excess return over the benchmark's return. A higher information ratio means better fund performance relative to the benchmark's performance on a risk-adjusted basis.

Formula:
$$Information \ Ratio = \frac{Average \ Relative \ Return}{Tracking \ Error}$$

$$Information \ Ratio \ Annualized = \sqrt{\frac{Number \ of \ Time \ Units \ Per \ Year}{Number \ of \ Time \ Units \ Per \ Sub \ Period}} \times Information \ Ratio$$

Sharpe Ratio

The Sharpe ratio is a risk-adjusted measure of performance developed by William F. Sharpe; it is also known as the reward-to-volatility ratio. It is calculated as the average subperiod excess return divided by the standard deviation of subperiod excess return over a given period. Subperiod excess return is the difference between the investment return and the CPFIS-OA guaranteed interest rate for a subperiod. A higher Sharpe ratio means better fund performance relative to the risk-free rate on a risk-adjusted basis. The Sharpe ratio is a special form of information ratio where the risk-free rate is the benchmark.

Formula:

$$Sharpe\ Ratio = \frac{Average\ Sub\ Period\ Excess\ Return}{Standard\ Deviation\ of\ Sub\ Period\ Excess\ Returns}$$

$$Sharpe\ Ratio\ Annualized = \sqrt{\frac{Number\ of\ Time\ Units\ Per\ Year}{Number\ of\ Time\ Units\ Per\ Sub\ Period}}} \times Sharpe\ Ratio$$

Standard Deviation

Standard deviation is a measure of investment risk or volatility in subperiod returns. It is calculated as the square root of variance, which is the average of the subperiod squared deviations over a given period. Higher standard deviation means higher risk.

Formula:

$$Variance = \frac{\sum (Sub\ Period\ Returns - Average\ Return)^2}{Number\ of\ Sub\ Periods - 1}$$

$$Standard\ Deviation = \sqrt{Variance}$$

$$Standard\ Deviation\ Annualized = \sqrt{\frac{Number\ of\ Time\ Units\ Per\ Year}{Number\ of\ Time\ Units\ Per\ Sub\ Period}} \times Standard\ Deviation$$

Maximum Gain

Maximum gain is the most positive monthly return over a given period.

Formula:

Maximum Gain = Max (Positive Sub-Period Returns)

Maximum Loss

Maximum loss is the most negative monthly return over a given period.

Formula:

Maximum Loss = Min (Negative Sub-Period Returns)

Return/Risk

The return/risk ratio is a measure of risk-adjusted performance. It is calculated as the average return divided by the standard deviation of subperiod returns over a given period. A higher return/risk ratio means better fund performance relative to fund volatility on a risk-adjusted basis.

Formula:

$$Return\ to\ Risk = \frac{Average\ Return}{Standard\ Deviation}$$

$$Return \ to \ Risk \ Annualized = \sqrt{\frac{Number \ of \ Time \ Units \ Per \ Year}{Number \ of \ Time \ Units \ Per \ Sub \ Period}} \times Return \ to \ Risk$$
