1 INTRODUCTION

Lipper has been appointed by Investment Management Association of Singapore (IMAS) and Life Insurance Association of Singapore (LIAS) to monitor the performance of all unit trusts and investment-linked insurance products included under the Central Provident Fund Investment Scheme (CPFIS). This report shows Lipper's findings for the three months ended June 30, 2020.

Important Disclaimers:

The data shown in this report is information for investors and is not a solicitation to buy, sell, or hold any fund. Past performance is not an indicator of future performance. Past performance is no guarantee of future return. This report should not be used as the sole basis for any investment decision. Before investing in any fund, investors should carefully read the prospectus or other necessary information about the fund. Lipper has used reasonable efforts in preparing this report based on data collected from the contributing asset management companies. However, Lipper doesn't guarantee the accuracy of the data contained herein and will not bear any responsibility for investment decisions of investors or for any loss arising from using the data presented in this report.

2 UPDATE ON CPFIS-INCLUDED FUNDS

As of June 30, 2020, there were 87 unit trusts and 149 investment-linked insurance products (ILPs) included under the CPFIS¹, for a total of 236 funds.

3 MARKET DEVELOPMENTS IN Q2 2020²

3.1 Equity Markets

All global equity markets rebounded sharply after Q1's big hit for Q2 2020. The MSCI World Index rallied by 19.54% (in U.S.-dollar terms) for Q2 2020, while it plunged 20.93% for Q1 2020. US NASDAQ Composite CR and Brazil BOVESPA (Ibovespa) TR index all posted over 30% while Singapore Straits Times CR and Hang Seng CR HKD only delivered 4.38% and 3.49%, respectively. In Europe, Xetra DAX TR, CAC 40 CR and FTSE 100 CR rallied 23.90%, 12.28% and 8.78%, respectively. In Asia, Korea, Taiwan, Thailand and India's market key benchmarks soared 20.16%, 19.71%, 18.93% and 18.49%, respectively.

² Since the Singapore fund universe is not domestically focused and invests in a host of regions, currencies, and asset classes, discussion of global macroeconomic trends is imperative to understand fund performance. Furthermore, to avoid confusion from counter-directional currency movements (against the Singapore dollar) in the discussion of market trends, all index/average performance figures in this section are expressed in local-currency or U.S.-dollar terms.

3.2 Bond Markets

The FTSE WGBI rose 2.04% for the quarter (in USD). The ten-year Treasury yield ended at 0.653% for the second quarter of 2020 versus 0.699% at the end of Q1 2020.

3.3 The Outlook

The coronavirus outbreak, which has led to countrywide lockdowns globally, has done extreme damage to the global economy. The International Monetary Fund (IMF) has sharply lowered its forecasts for global growth this year by an additional 1.9%, compared to its forecast in April, and it now expects global GDP to shrink by 4.9% in 2020. The COVID-19 pandemic has had a more negative impact on activity in the first half of 2020 than anticipated, and the recovery is projected to be more gradual than previously forecast. The U.S. economy suffered its worst period ever in the second quarter, with GDP falling a historic 32.9%. Neither the Great Depression nor the Great Recession nor any other slump over the past two centuries have ever caused such a sharp drain on the economy. The world is now facing a resurgence of covid-19 cases as the pandemic continues to accelerate. Moreover, tensions between China and the U.S. escalated further this year over a variety of issues, from the origins of the coronavirus outbreak, to their rivalry over the South China Sea, and the passing of a controversial national security law in Hong Kong. Global financial markets continue experiencing significant volatility and risk.

5 SUMMARY OF PERFORMANCE OF CPFIS-INCLUDED FUNDS

	Period ended 30-Jun-2020(% in SGD)			
	3 Months	1 Year	3 Years (Cumulative)	3 Years (Annualized)
Average of CPFIS-included unit trusts & ILPs	11.58	1.66	9.58	3.10
CPFIS-included unit trusts	13.00	1.03	9.05	2.93
CPFIS-included ILPs	10.66	2.07	9.90	3.20

Source: Lipper

The average returns³ of CPFIS-included unit trusts and ILPs are shown below:

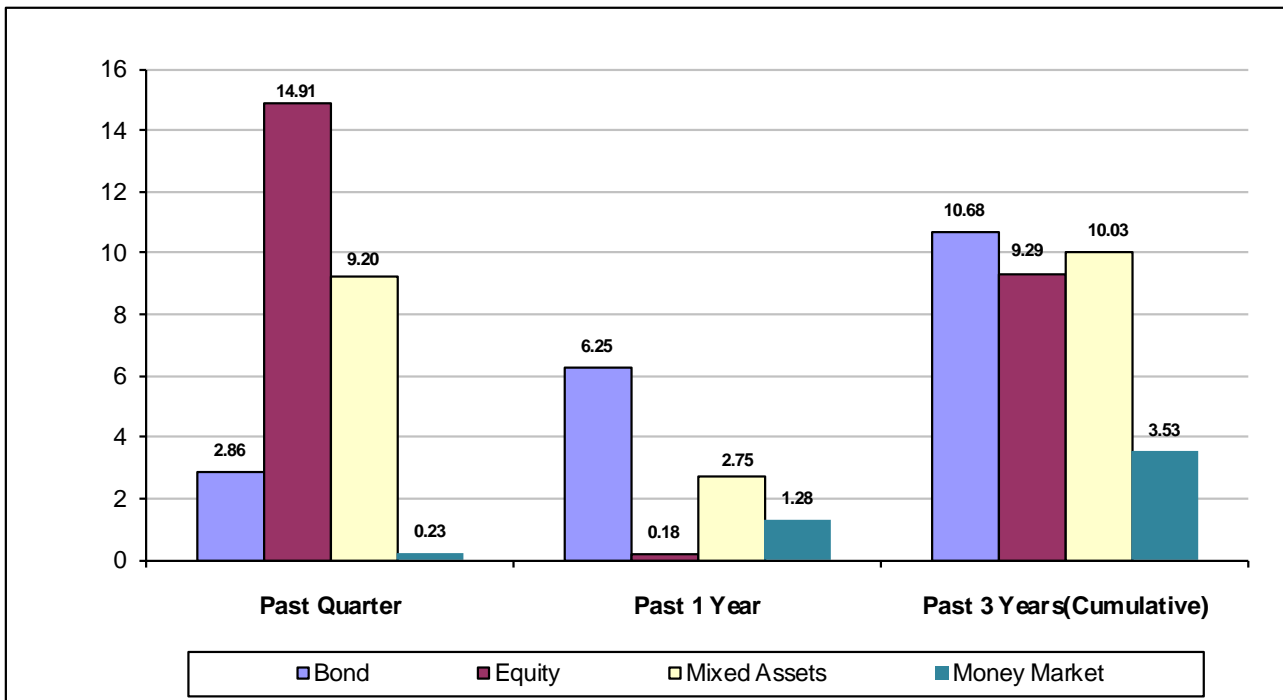

Figure 3 Average Performance of CPFIS-Included Funds at End Q2 2020 (% in SGD)

Source: Lipper

³ Average performance is calculated by a summation of all returns of funds in the group, divided by the number of funds.

Figure 4 Average Performance of CPFIS-Included Funds at End Q2 2020 by Asset Class (% in SGD)

Source: Lipper

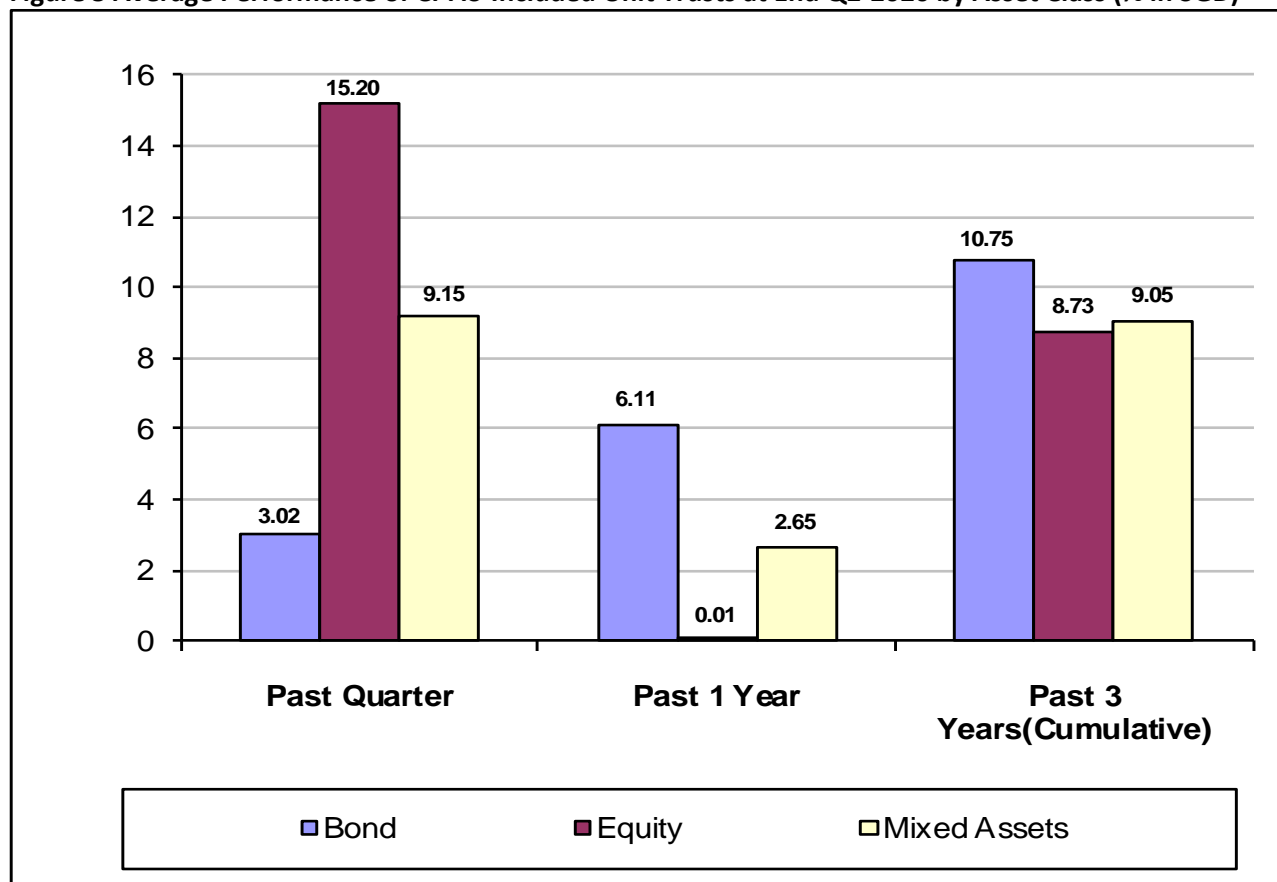

For the second quarter of 2020, the overall performance of CPFIS-included funds (unit trusts and ILPs combined) continued posting positive returns of 11.58% on average, given a positive return of 13.00% on average among CPFIS-included unit trusts and a positive return of 10.66% among CPFIS-included ILPs. For all the CPFIS-included funds, all asset type of funds posted positive return, Equity funds posted 14.91% on average while Money Market funds only posted positive return of 0.23% for the quarter. MSCI World TR USD and MSCI AC Asia ex Japan Index rallied 17.12% and 14.43%, respectively while FTSE WGBI Index slightly fell 0.02% for Q2 2020.

For the one-year period, the overall performance of CPFIS-included funds posted positive return of 1.66% on average. CPFIS-included unit trusts slightly rose 1.03% on the year, and CPFIS-included ILPs soared 2.07% on average. During the same period, the key benchmark MSCI World TR USD and MSCI AC Asia ex Japan Index rallied 6.61% and 5.14% respectively, while FTSE WGBI TR soared 7.85% for the period. For the one-year period, Bond (+6.25% on average) fund outperformed Equity (+0.18% on average), mixed-asset (+2.75% on average) and money market (+1.28% on average) fund offering.

For the three-year period, CPFIS-included funds achieved 9.58% growth on average, accounted for a positive return of 9.05% on average from CPFIS-included unit trusts and positive return of 9.90% on average from CPFIS-included ILPs. During the same period, MSCI World TR USD and MSCI AC Asia ex Japan Index rallied 25.13% and 13.65% respectively, meanwhile, the FTSE WGBI TR also achieved 13.92%. Bond type was the leading gainer (+10.68%), meanwhile, equity and mixed-asset type posted positive return of 9.29% and 10.03% on average for the period.

The average returns of CPFIS-included unit trusts by asset class⁴ are shown below:

Figure 5 Average Performance of CPFIS-Included Unit Trusts at End Q2-2020 by Asset Class (% in SGD)

Source: Lipper

For the second quarter of 2020, all asset type of unit trust portfolios posted positive returns. Equity type of unit trust portfolios posted positive returns of 15.20% on average, while bond and mixed-asset funds posted positive return of 3.02% and 9.15%, respectively.

Bond type of unit trust portfolios posted positive returns of 6.11% on average, while equity type only slightly rose 0.01% for the period for one-year period.

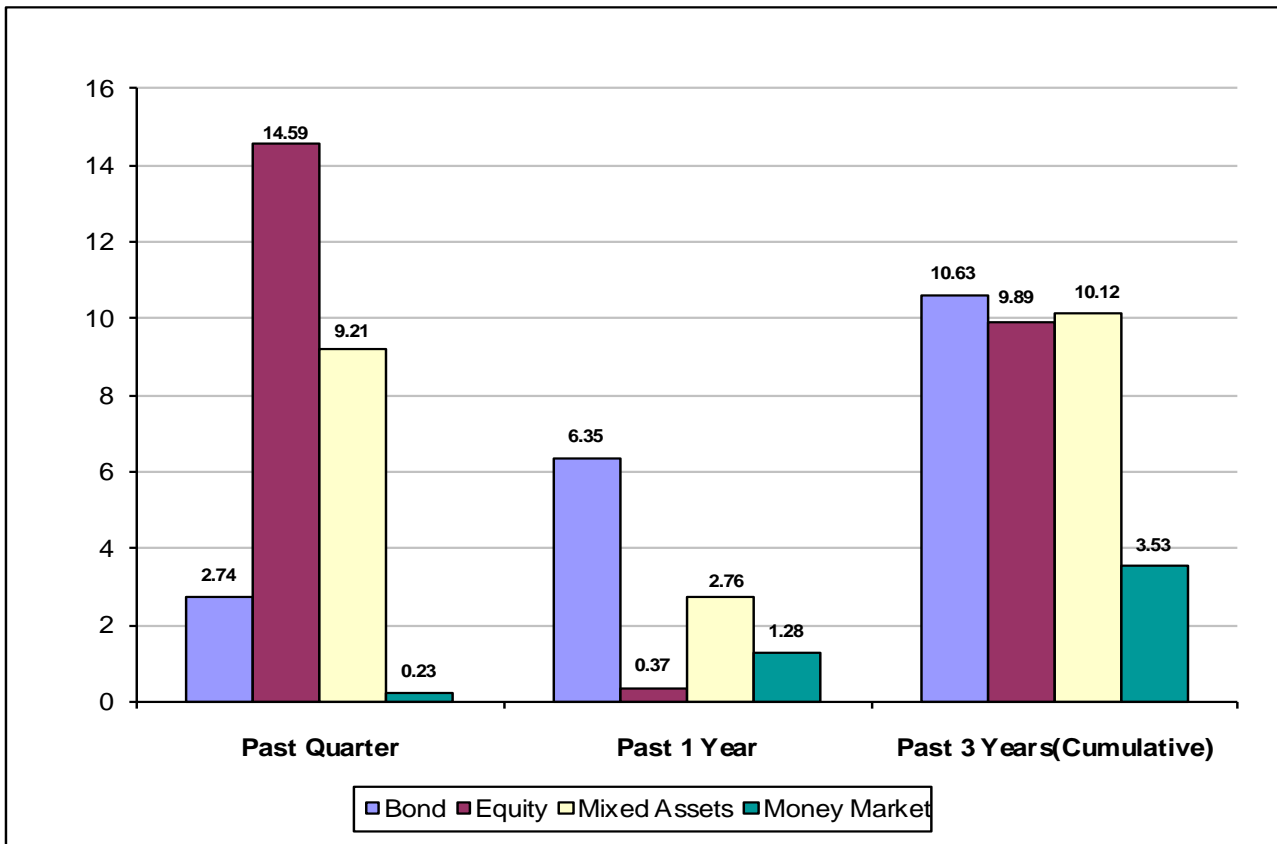

Bond fund (+10.75%) outperformed the other asset class offerings over the three-year period (through June 2020) while equity and mixed-asset posted positive return of 8.73% and 9.05% on average, respectively, for the period.

⁴ Definitions of asset types are as follows:

- Equity: Funds with the primary investment objective of investing in stock markets
- Bond: Funds with the primary investment objective of investing in fixed income markets with an average maturity > 1 year
- Mixed-asset: Funds with the primary investment objective of investing in a strategic mix of equities and fixed income securities
- Money market: Funds with the primary investment objective of investing in fixed income markets with an average residual life to maturity < 12 months

The average returns of CPFIS-included investment-linked insurance products by asset class are shown below:

Figure 6 Average Performance of CPFIS-Included ILPs at End Q2-2020 by Asset Class (% in SGD)

Source: Lipper

For the second quarter of 2020, equity and mixed-asset portfolios of ILPs posted positive return of 14.59% and 9.21% on average while bond and money market funds posted positive return of 2.74% and 0.23%, respectively.

For the one-year period, bond funds (+6.35% on average) outperformed the equity (+0.37%), money market (+1.28% on average) and mixed-asset funds (+2.76% on average), respectively. For the three-year period, bond funds were the leading gainers (+10.63%), while equity, mixed-asset and money market portfolios of ILPs delivered 9.89%, 10.12% and 3.53% on average respectively.

6 SUMMARY OF RISK-ADJUSTED PERFORMANCE

The Lipper Leader rating methodology consists of four metrics that rate funds' success in meeting certain goals:

- **Total Return: Ability of a fund to provide superior total return compared to its peers**
- **Consistent Return: Ability of a fund to provide relatively superior consistency and risk-adjusted return compared to its peers**
- **Preservation: Ability of a fund to demonstrate superior preservation of capital in a variety of markets compared with other funds in its asset class**
- **Expense: Ability of a fund to successfully manage to keep its expenses low relative to its peers and within its load structure**

Funds are ranked against their Lipper peer group classifications for a three-year period. In other words, if a fund doesn't have at least three years of historical performance and it is not in a group with more than five funds, it is not rated by Lipper. The rating is based on an equal-weighted average of percentile ranks of the four Lipper Leader metrics.

For each metric:

The top 20% of funds receive a rating of "5" and are named **Lipper Leaders**.

The next 20% of funds receive a rating of "4."

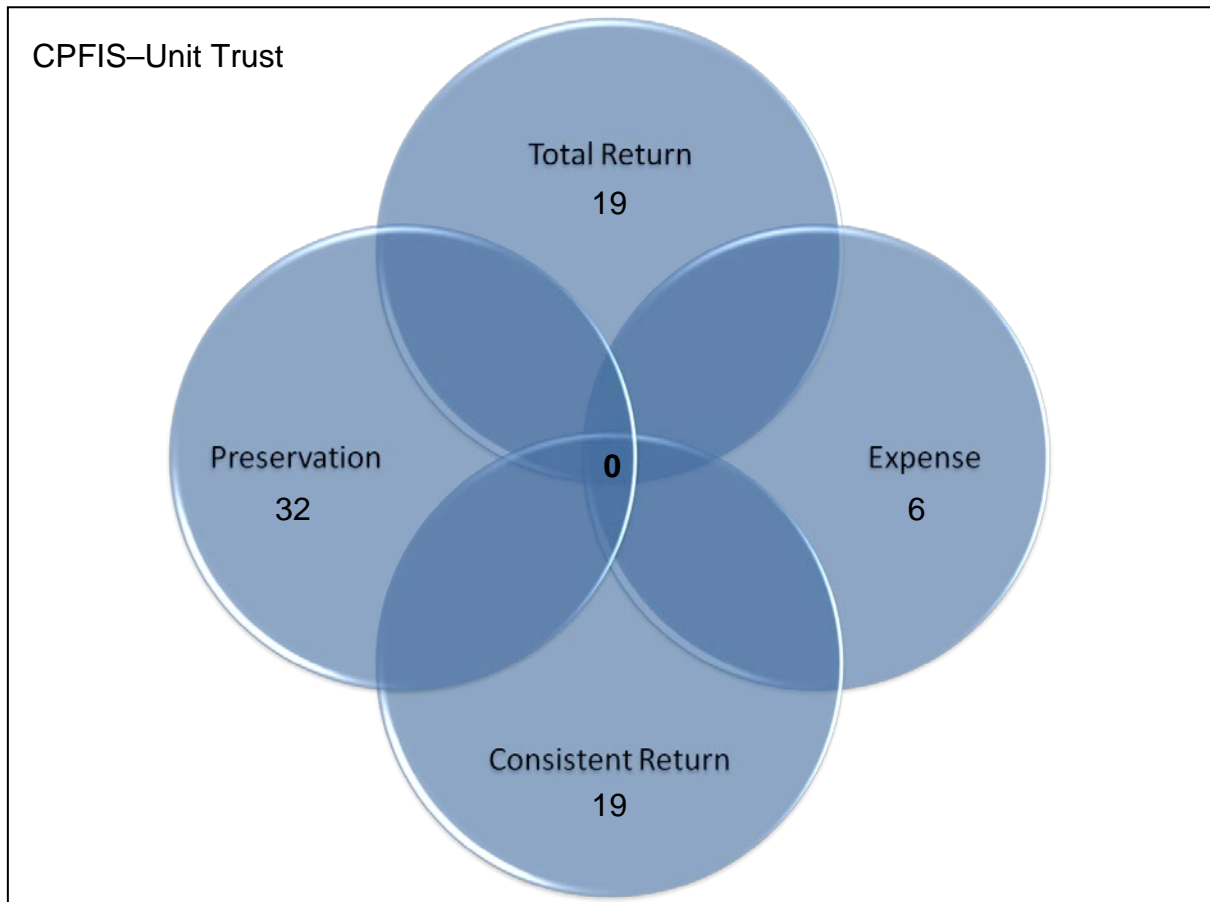

The middle 20% of funds receive a rating of "3."

The next 20% of funds receive a rating of "2."

The lowest 20% of funds receive a rating of "1."

6.1 Lipper Leader Rating for CPFIS-Included Unit Trusts

Figure 6 Venn Diagram of CPFIS–Included Unit Trusts With a Lipper Leader Rating (Rating of “5”)

Source: Lipper

As at end June 2020, the number of CPFIS-included unit trusts in the top 20% of funds, receiving a rating of “5” and named Lipper Leaders in each metric, was as follows:

- Total Return: 19 funds
- Consistent Return: 19 funds
- Preservation: 32 funds
- Expense: 6 funds

There is no CPFIS-included unit trust with rating of “5” (Lipper Leader) across all four metrics.

6.2 Lipper Leader Rating for CPFIS-Included ILPs

Figure 7 Venn Diagram of CPFIS-Included ILPs With a Lipper Leader Rating (Rating of “5”)

Source: Lipper

As at end June 2020, the number of CPFIS-included ILPs in the top 20% of funds, receiving a rating of “5” and named Lipper Leaders, in each metric was as follows:

- Total Return: 30 funds
- Consistent Return: 28 funds
- Preservation: 42 funds
- Expense: 18 funds

GreatLink Global Supreme Fund and NTUC Global Managed Fund (Balanced) received a rating of “5” (Lipper Leader) across all four metrics.

Lipper Leader Rating Methodology

Unlike many competing quantitative measures, the strength of the Lipper Leader rating system is that it uses investor-centered criteria and not asset- or style/strategy-based criteria. These investor-centered criteria deliver clear, straightforward descriptions of a fund’s success in meeting certain goals, such as preserving capital or building wealth through consistent, strong returns.

Investor-centered measures of fund performance and suitability

The Lipper Leader rating system consists of four metrics that provide clear, straightforward descriptions of a fund’s success in meeting certain goals for constructing individualized portfolios.

-  **Total Return**
-  **Consistent Return**
-  **Preservation**
-  **Expense**

Determine whether you are investing in funds that fit your investment goals

Lipper Leaders provide context and perspective for making informed investment decisions but do not predict future performance. Funds are ranked against their Lipper peer group classifications each month for three-, five-, and ten-year periods and for the overall period. These ratings are based on an equal-weighted average of percentile ranks of the four Lipper Leader metrics.

For each metric:

-  The top 20% of funds receive a rating of “5” and are named **Lipper Leaders**.
-  The next 20% of funds receive a rating of “4.”
-  The middle 20% of funds receive a rating of “3.”
-  The next 20% of funds receive a rating of “2.”
-  The lowest 20% of funds receive a rating of “1.”

Lipper Leader Metrics

Total Return

The Lipper Leader rating for Total Return denotes a fund that has provided superior total return (income from dividends and interest as well as capital appreciation) compared to a group of similar funds. A Lipper Leader for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors the Total Return rating can be used with the Preservation and/or Consistent Return ratings to make an appropriate selection that balances risk and return.

Expense

The Lipper Leader rating for Expense identifies a fund that has successfully managed to keep its expenses low relative to its peers and within its load structure. A Lipper Leader for Expense may be the best fit for investors who want to minimize their total costs. This measure can be used in conjunction with Total Return or Consistent Return to identify funds with above-average performance and lower-than-average cost.

Consistent Return

The Lipper Leader rating for Consistent Return identifies a fund that has provided relatively superior consistency and risk-adjusted returns compared to a group of similar funds. Funds that achieve high ratings for Consistent Return may be the best fit for investors who value a fund's year-to-year consistency relative to other funds in a particular peer group.

Investors are cautioned that some peer groups are inherently more volatile than others, and even Lipper Leaders for Consistent Return in the most volatile groups may not be well suited to shorter-term goals or less risk-tolerant investors.

Preservation

The Lipper Leader rating for Preservation is for a fund that has demonstrated a superior ability to preserve capital in a variety of markets compared with other funds in its asset class.

Choosing a Lipper Leader for Preservation may help to minimize downside risk relative to other fund choices in the same asset class. Investors are cautioned that equity funds have historically been more volatile than mixed-equity or fixed income funds, and that even a Lipper Leader for Preservation in more volatile asset classes may not be well suited to shorter-term goals or less risk-tolerant investors.

7.2 Investment Terminology Definitions

Lipper Global Classification

The Lipper Global Classification (LGC) is the unique fund classification system developed by Lipper to assist fund information users in comparing fund performance within a reasonable peer group. Its purpose is to create homogeneous groups of funds with comparable investment objectives. We refine our existing classifications to ensure meaningful peer groups and add new classifications in response to client requests and market trends.

For more information please visit <http://www.lipperweb.com/Research/ClassMethodology.aspx>

Quantitative Analysis

- **Return**

All returns are calculated on a NAV-to-NAV basis in Singapore dollars with dividends reinvested. The gain or loss of a particular fund in a particular period is calculated with the following formula:

Performance

$$\text{Percentage Growth} = \frac{\text{NAV}_t - \text{NAV}_{t-1}}{\text{NAV}_{t-1}}$$

For simple return:

$$\text{Performance Annualized} = \left(1 + \text{Percentage Growth}\right)^{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units in Period}}} - 1$$

- **Return Relative to Benchmark**

Relative return is a measure of fund performance relative to its benchmark's performance. It is calculated as the difference between the fund's return and the benchmark's return over a given period. Higher relative return means better fund performance relative to the benchmark's performance.

Formula:

$$\text{Relative Return} = \text{Fund Return} - \text{Benchmark Return}$$

▪ **Expense Ratio**

Expense ratio expresses the management, trustee, and certain other expenses of a managed fund as a proportion of the net asset value of the fund. The expense ratio expresses the sum of all operating expenses charged on an ongoing basis to the fund’s assets as a percentage of the fund’s average net asset value and is calculated using the following formula:

$$\text{Total Expense Ratio (\%)} = \frac{\text{Total Operating Expenses}}{\text{Average Net Asset Value}} \times 100$$

▪ **Information Ratio**

Information ratio is a risk-adjusted measure of a fund’s performance relative to its benchmark’s performance. (The fund’s benchmark can be found in the supplementary document Return Performance Review.) The information ratio is given by the ratio of average relative return (excess return) and tracking error. Tracking error or tracking risk refers to the volatility or standard deviation of the investment manager’s excess return over the benchmark’s return. A higher information ratio means better fund performance relative to the benchmark’s performance on a risk-adjusted basis.

Formula:

$$\text{Information Ratio} = \frac{\text{Average Relative Return}}{\text{Tracking Error}}$$

$$\text{Information Ratio Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Information Ratio}$$

▪ **Sharpe Ratio**

The Sharpe ratio is a risk-adjusted measure of performance developed by William F. Sharpe; it is also known as the reward-to-volatility ratio. It is calculated as the average subperiod excess return divided by the standard deviation of subperiod excess return over a given period. Subperiod excess return is the difference between the investment return and the CPFIS-OA guaranteed interest rate for a subperiod. A higher Sharpe ratio means better fund performance relative to the risk-free rate on a risk-adjusted basis. The Sharpe ratio is a special form of information ratio where the risk-free rate is the benchmark.

Formula:

$$\text{Sharpe Ratio} = \frac{\text{Average Sub Period Excess Return}}{\text{Standard Deviation of Sub Period Excess Returns}}$$

$$\text{Sharpe Ratio Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Sharpe Ratio}$$

▪ **Standard Deviation**

Standard deviation is a measure of investment risk or volatility in subperiod returns. It is calculated as the square root of variance, which is the average of the subperiod squared deviations over a given period. Higher standard deviation means higher risk.

Formula:

$$\text{Variance} = \frac{\sum (\text{Sub Period Returns} - \text{Average Return})^2}{\text{Number of Sub Periods} - 1}$$

$$\text{Standard Deviation} = \sqrt{\text{Variance}}$$

$$\text{Standard Deviation Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Standard Deviation}$$

▪ **Maximum Gain**

Maximum gain is the most positive monthly return over a given period.

Formula:

$$\text{Maximum Gain} = \text{Max (Positive Sub-Period Returns)}$$

▪ **Maximum Loss**

Maximum loss is the most negative monthly return over a given period.

Formula:

$$\text{Maximum Loss} = \text{Min (Negative Sub-Period Returns)}$$

▪ **Return/Risk**

The return/risk ratio is a measure of risk-adjusted performance. It is calculated as the average return divided by the standard deviation of subperiod returns over a given period. A higher return/risk ratio means better fund performance relative to fund volatility on a risk-adjusted basis.

Formula:

$$\text{Return to Risk} = \frac{\text{Average Return}}{\text{Standard Deviation}}$$

$$\text{Return to Risk Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Return to Risk}$$
