Fund Processing 2007 Automation Conference

SINGAPORE

January 30th 2007
Raffles Hotel Singapore

(A SWIFT Masterclass Series)

SWIFT and *EuroEvents* cordially invite you to join the **Fund Processing Automation Conference 2007**.

Following on the success of the MasterClass on Fund Automation events held across Asia previously, EuroEvents and SWIFT will host the new series in Singapore on the **30th January 2007 (Tuesday)**.

There has been a growing focus in the industry on standardising and automating the fund administration process. This drive is gaining momentum rapidly in Europe and, now Asia, with many of the leading players committed to adopting SWIFTNet Funds. In August, Fidelity and HSBC Institutional Trust Services went live on SWIFTNet Fund. This not only marked an exciting milestone for Asia but also kick-started automation in the local market with a number of key players already pushed ahead their automation projects.

The conference will bring together keynote speakers from the fund managers and distributors as well as the regional experts from SWIFT to discuss the latest trends and their action plans. The key players who have adopted the fund automation standard will share their experiences with the audience and it provides the best opportunities for participants to network and interact with representatives from these leading institutions.

Seats are limited and will be in first-come first-served basis.

REGISTER NOW at: **www.euro-events.com/conf/swift-fa/sg/** **(free for industry participants)**

DETAILS

Topics

Through a mixture of presentations, panel discussions, case studies and solution exhibitions delegates will learn:

- How fund automation can help reduce operational and processing costs
- The implementation issues of fund automation projects and case studies
- The benefits of fund automation
- How to get started with SWIFTNet Funds
- Solutions for different types of institutions
- The latest projects in Asia
