1 INTRODUCTION

Thomson Reuters Lipper has been appointed by Investment Management Association of Singapore (IMAS) and Life Insurance Association of Singapore (LIAS) to monitor the performance of all unit trusts and investment-linked insurance products included under the Central Provident Fund Investment Scheme (CPFIS). This report shows Lipper's findings for the three months ended March 31, 2016.

Important Disclaimers:

The data shown in this report is information for investors and is not a solicitation to buy, sell, or hold any fund. Past performance is not an indicator of future performance. Past performance is no guarantee of future return. This report should not be used as the sole basis for any investment decision. Before investing in any fund, investors should carefully read the prospectus or other necessary information about the fund. Thomson Reuters Lipper has used reasonable efforts in preparing this report based on data collected from the contributing asset management companies. However, Thomson Reuters Lipper doesn't guarantee the accuracy of the data contained herein and will not bear any responsibility for investment decisions of investors or for any loss arising from using the data presented in this report.

2 UPDATE ON CPFIS-INCLUDED FUNDS

As of March 31, 2016, there were 102 unit trusts and 176 investment-linked insurance products (ILPs) included under the CPFIS¹, for a total of 278 funds.

3 MARKET DEVELOPMENTS IN Q1 2016²

3.1 Equity Markets

Global equity markets performed varied from country to country in Q1 2016. The MSCI World Index slightly slumped 0.19% (in U.S.dollar terms) for Q1 2016, while it soared 5.62% for Q4 2015. With the rally of oil and commodity prices, Russia RTS and Brazil BOVESPA Index rallied over 15% for Q1 2016. For U.S market, the Dow Jones Industrial Index and S&P 500 rallied 1.49% and 0.77%, respectively, while NASDAQ slumped 2.75% for the period. Most European equity markets also delivered negative performance for Q1 2016. Xetra DAX, CAC 40 and FTSE 100 Index plunged 7.24%, 5.43% and 1.08%, respectively (all in local currencies). In Asia, Thailand SET Index took the lead and soared 9.29%, while China Shanghai Composite index plunged 15.12% for Q1 2016.

² Since the Singapore fund universe is not domestically focused and invests in a host of regions, currencies, and asset classes, discussion of global macroeconomic trends is imperative to understand fund performance. Furthermore, to avoid confusion from counter-directional currency movements (against the Singapore dollar) in the discussion of market trends, all index/average performance figures in this section are expressed in local-currency or U.S.-dollar terms.

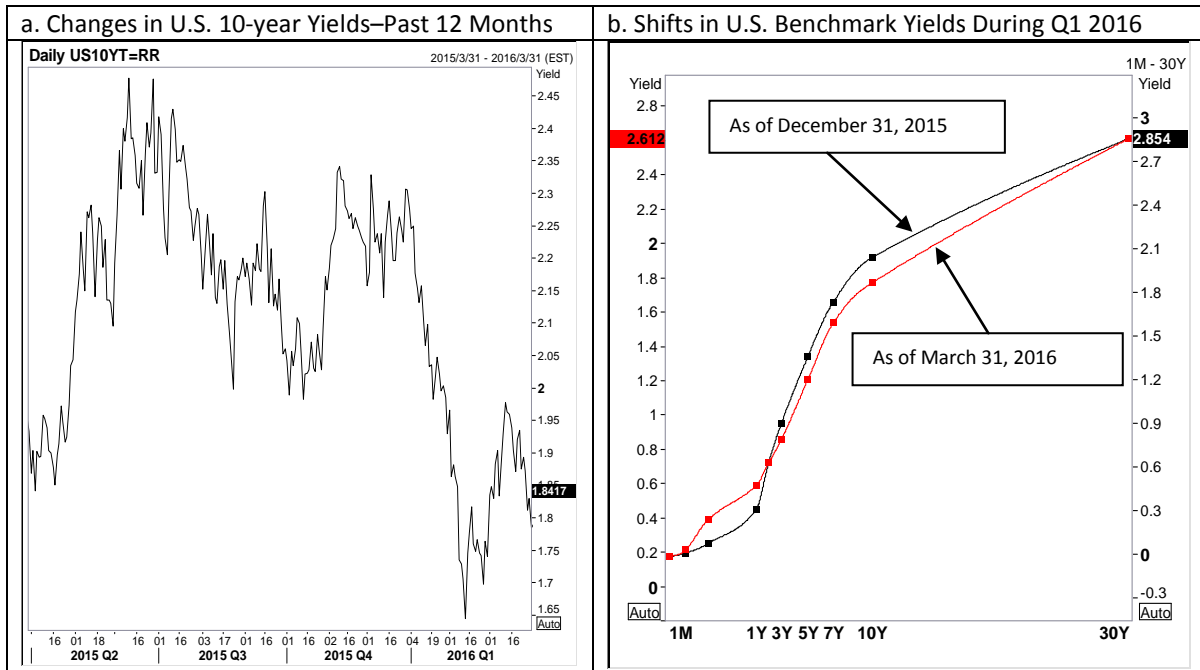

3.2 Bond Markets

The Citigroup WGBI rallied 7.09% for the quarter (in USD). The ten-year Treasury ended at 1.784% for the first quarter of 2016 versus 2.275% on the end of Q4 2015

3.3 The Outlook

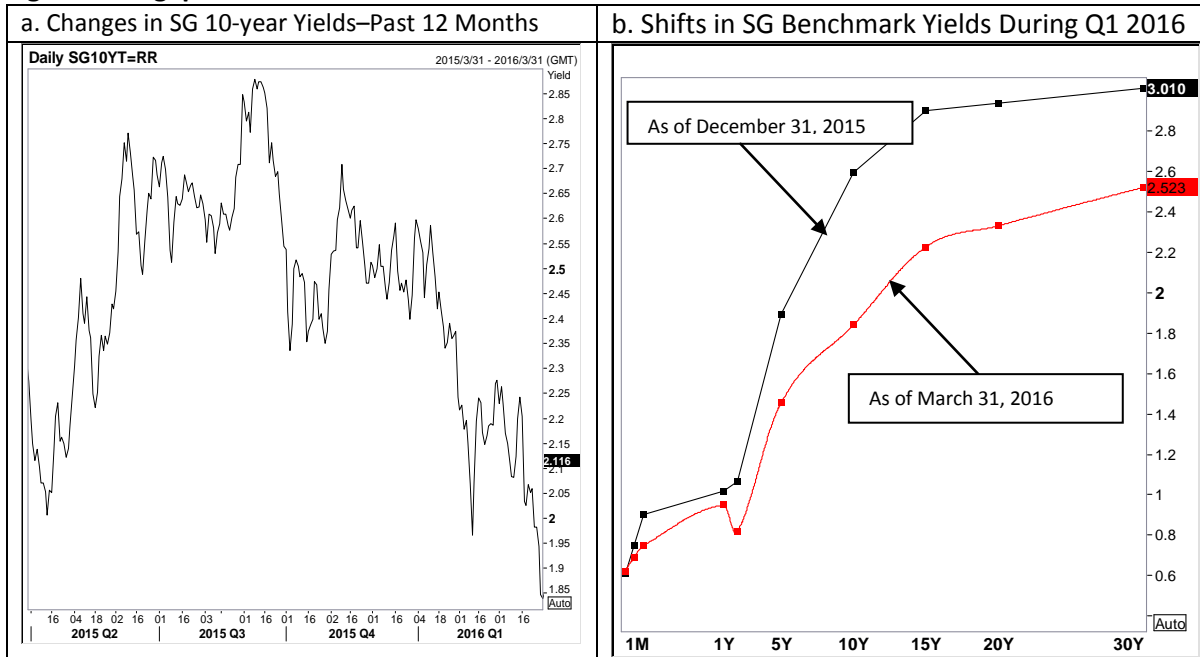

The U.S. Federal Reserve kept interest rates unchanged, noting that it “continues to closely monitor inflation indicators and global economic and financial developments”. The Fed chair Janet Yellen signaled concerns about raising rates too quickly given headwinds facing the US economy. It is expected that Fed has moved toward delaying rate hikes for the near term. The European Central Bank also left its policy mix unchanged after twice boosted its stimulus since December, but ECB President Mario Draghi reopened the door to fresh interest-rate cuts. The Bank of Japan (BOJ) surprisingly held off on expanding monetary stimulus, after implementing the negative rate a couple of months ago. Disappointment over the bank's inaction sent the dollar-yen currency pair tumbling more than 5 percent to the 106 handle, sparking concerns of extended yen strength. The world economy is increasingly at risk of stalling. The International Monetary Fund (IMF) had warned it once again cut its forecast for global growth prospects. With the global economy still struggling, the growth outlook is weaker in advanced and emerging economies alike. Global markets are likely to continue fluctuating.

5 SUMMARY OF PERFORMANCE OF CPFIS-INCLUDED FUNDS

The average returns³ of CPFIS-included unit trusts and ILPs are shown below:

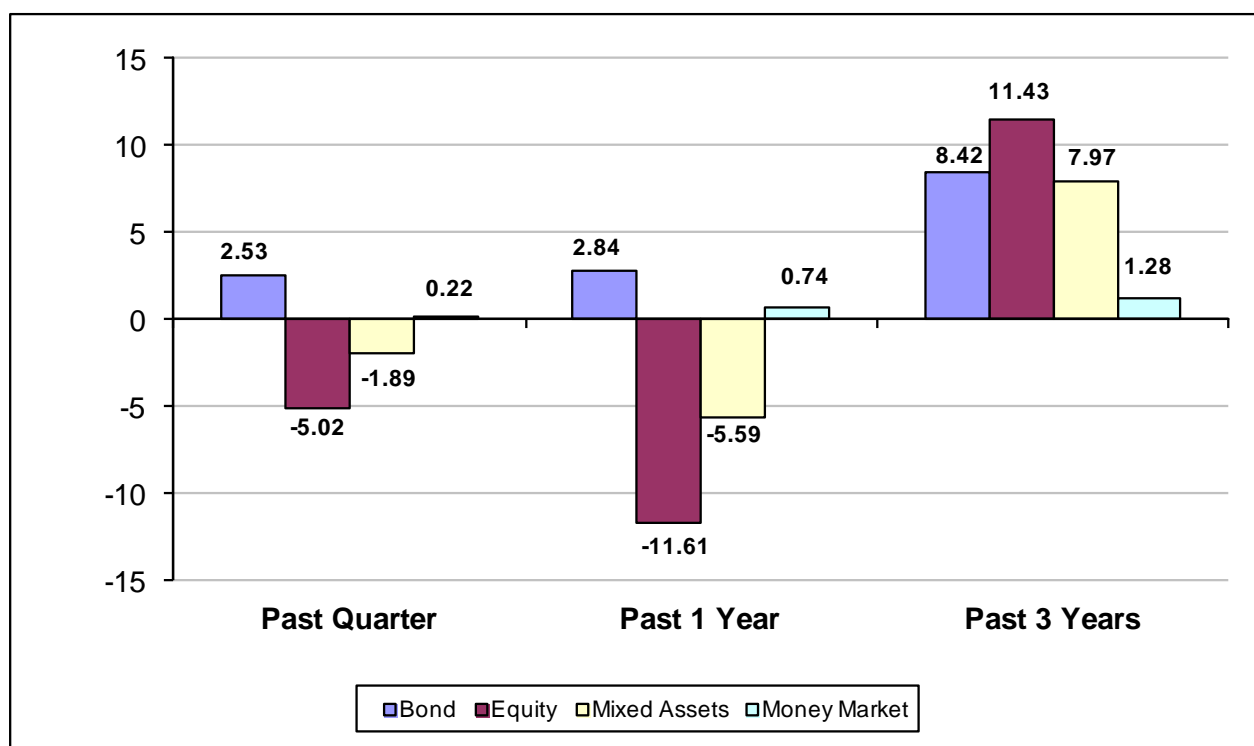

Figure 3 Average Performance of CPFIS-Included Funds at End Q1 2016 (% in SGD)

Source: Thomson Reuters Lipper

³ Average performance is calculated by a summation of all returns of funds in the group, divided by the number of funds.

Figure 4 Average Performance of CPFIS-Included Funds at End Q1 2016 by Asset Class (% in SGD)

Source: Thomson Reuters Lipper

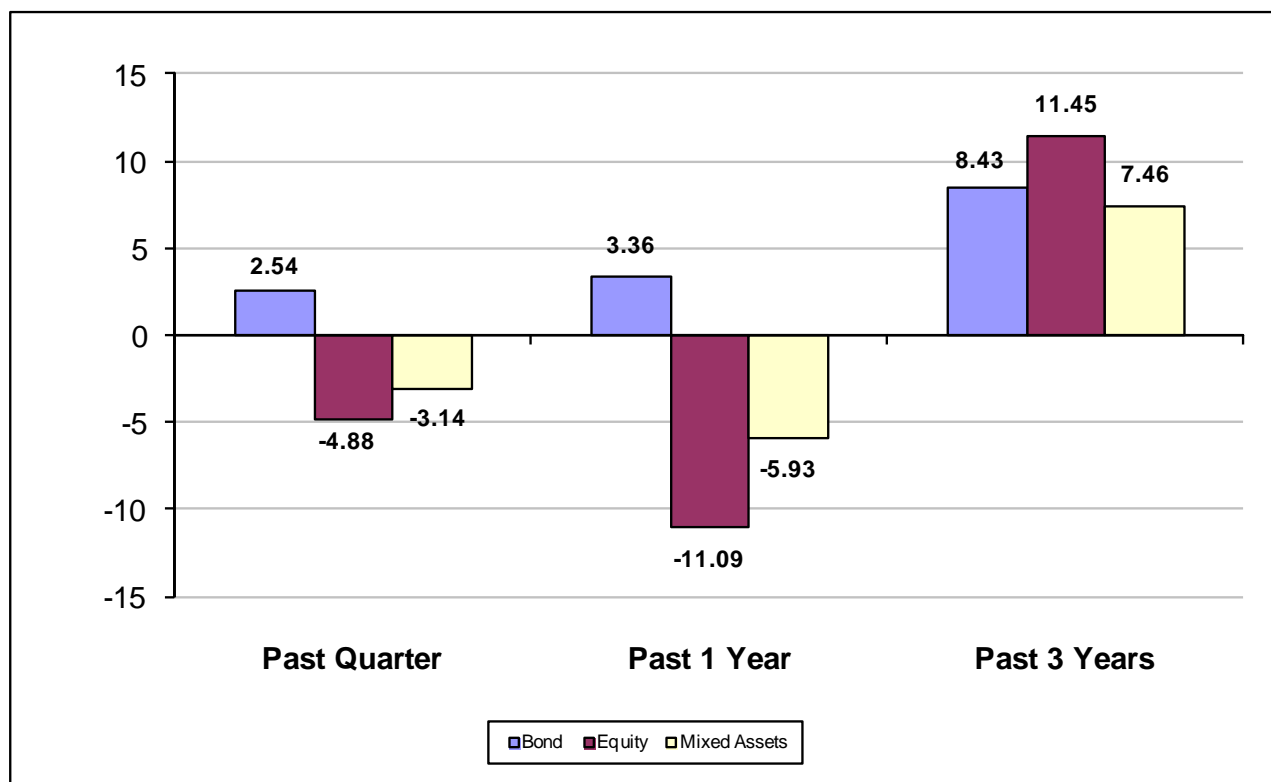

For the first quarter of 2016, the overall performance of CPFIS-included (unit trusts and ILPs combined) funds posted negative returns of 3.26% on average, given a negative return of 3.80% on average among CPFIS-included unit trusts and a negative return of 2.90% among CPFIS-included ILPs. For all the CPFIS-included, Equity and mixed-asset posted a negative return of 5.02% and 1.89%, while bond and money market types posted 2.53% and 0.22%, respectively for the quarter. The MSCI World TR USD plunged 5.26% and the MSCI AC Asia ex Japan Index slid 3.36% for Q1 2016, while the Citigroup WGBI soared 1.65% for the quarter.

For the 12-month period the overall performance of CPFIS-included funds posted a negative return of 7.98% on average. CPFIS-included unit trusts slid 8.45% on the year, and CPFIS-included ILPs fell 7.72% on average. During the same period the key benchmark MSCI World TR USD slumped 4.67% and MSCI AC Asia ex Japan Index slid 13.21%, respectively, while the Citigroup WGBI TR rallied 3.99%. For the one-year period bond products (+2.84% on average) outperformed the equity (-11.61% on average), mixed-asset (-5.59% on average) and money market (+0.74%) type offering.

For the three-year period CPFIS-included funds soared 9.92% growth on average, accounted for by a gain of 10.59% on average from CPFIS-included unit trusts and 9.54% on average from CPFIS-included ILPs. During the same period MSCI World TR USD rallied 34.52%, while MSCI AC Asia ex Japan Index soared 9.80%, while the Citigroup WGBI TR rose 10.15%. Equity type was the leading gainers (+11.43%), while money market portfolio posted 1.28% on average for the period.

The average returns of CPFIS-included unit trusts by asset class⁴ are shown below:

Figure 5 Average Performance of CPFIS-Included Unit Trusts at End Q1-2016 by Asset Class (% in SGD)

Source: Thomson Reuters Lipper

During first quarter 2016, only bond funds of UT portfolios posted positive return of 2.54%, while equity and mixed-asset posted negative return of 4.88% and 3.14% on average, respectively.

On average for the one-year period, only bond funds of UT portfolios posted positive return of 3.36%, while equity and mixed-asset posted negative return of 11.09% and 5.93% on average, respectively.

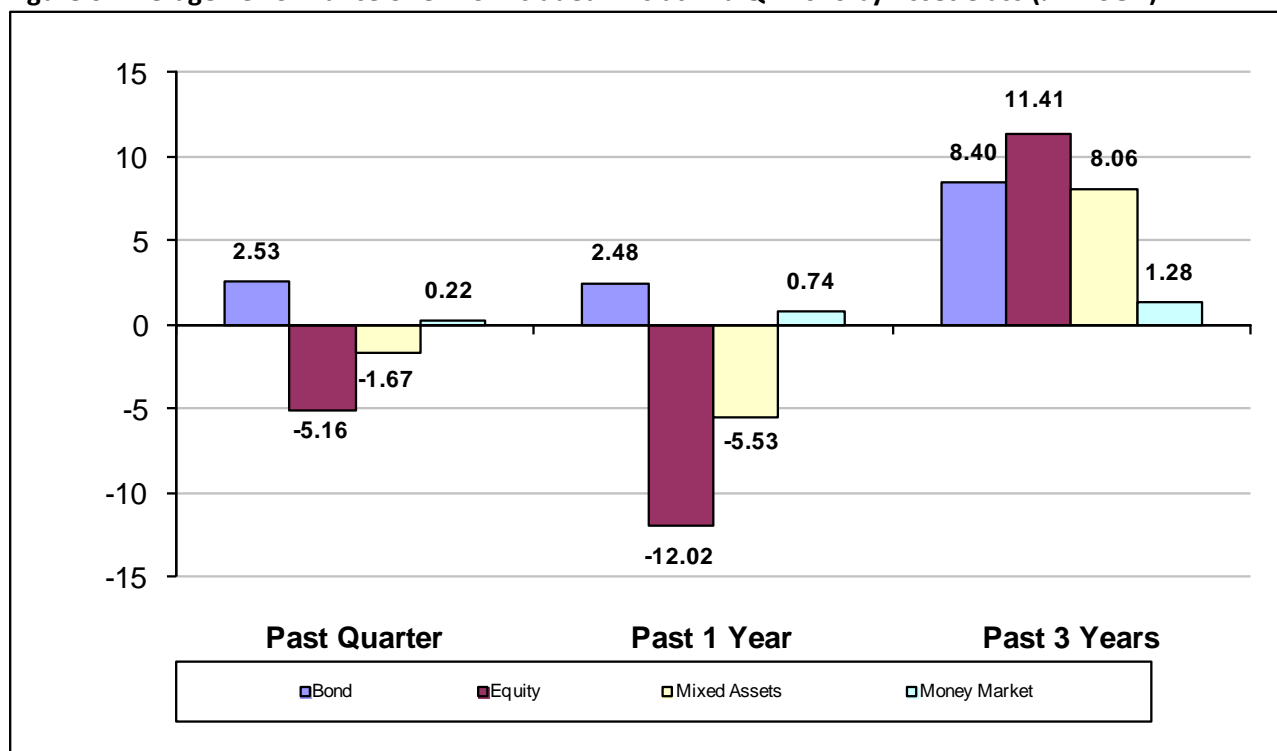

Equity products (+11.45%) outperformed the other asset class offerings over the three-year period, and mixed-asset and bond types posted gains of 7.46% and 8.43% on average, respectively, for the three years through March 2016.

⁴ Definition of asset types is as follows:

- Equity: Funds with the primary investment objective of investing in stock markets
- Bond: Funds with the primary investment objective of investing in fixed income markets with an average maturity > 1 year
- Mixed-asset: Funds with the primary investment objective of investing in a strategic mix of equities and fixed income securities
- Money market: Funds with the primary investment objective of investing in fixed income markets with an average residual life to maturity < 12 months

The average returns of CPFIS-included investment-linked insurance products by asset class are shown below:

Figure 6 Average Performance of CPFIS-Included ILPs at End Q1-2016 by Asset Class (% in SGD)

Source: Thomson Reuters Lipper

For first quarter 2016 ILP portfolios, bond and money market portfolios posted positive returns of 2.53%, and 0.22%, while equity and mixed-asset posted negative return of 5.16% and 1.67% on average, respectively.

For the one-year period bond products (+2.48% on average) outperformed the equity offerings (-12.02% on average), mixed-asset type (-5.53% on average) and money market (+0.74% on average). For the three-year period equity funds were the leading gainers (+11.41%). Bond, mixed-asset and money market portfolios delivered 8.40%, 8.06% and 1.28% growth, on average, respectively.

6 SUMMARY OF RISK-ADJUSTED PERFORMANCE

The Lipper Leader rating methodology consists of four metrics that rate funds' success in meeting certain goals:

- **Total Return: Ability of a fund to provide superior total return compared to its peers**
- **Consistent Return: Ability of a fund to provide relatively superior consistency and risk-adjusted return compared to its peers**
- **Preservation: Ability of a fund to demonstrate superior preservation of capital in a variety of markets compared with other funds in its asset class**
- **Expense: Ability of a fund to successfully manage to keep its expenses low relative to its peers and within its load structure**

Funds are ranked against their Lipper peer group classifications for a three-year period. In other words, if a fund doesn't have at least three years of historical performance and it is not in a group with more than five funds, it is not rated by Lipper. The rating is based on an equal-weighted average of percentile ranks of the four Lipper Leader metrics.

For each metric:

The top 20% of funds receive a rating of "5" and are named **Lipper Leaders**.

The next 20% of funds receive a rating of "4."

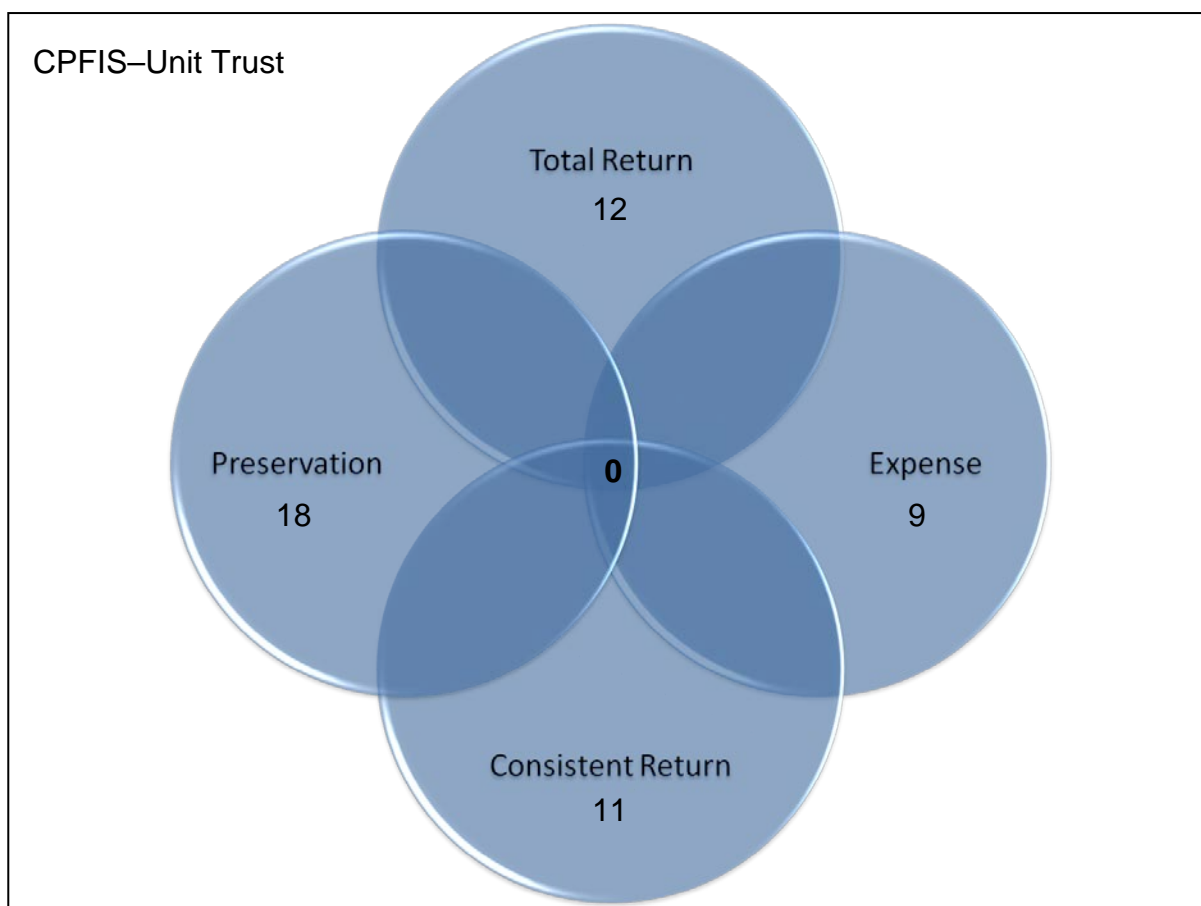

The middle 20% of funds receive a rating of "3."

The next 20% of funds receive a rating of "2."

The lowest 20% of funds receive a rating of "1."

6.1 Lipper Leader Rating for CPFIS-Included Unit Trusts

Figure 6 Venn Diagram of CPFIS-Included Unit Trusts With a Lipper Leader Rating (Rating of “5”)

Source: Thomson Reuters Lipper

As of the end of March 2016 the number of CPFIS-included unit trusts in the top 20% of funds, receiving a rating of “5” and named Lipper Leaders in each metric, was as follows:

- Total Return: 12 funds
- Consistent Return: 11 funds
- Preservation: 18 funds
- Expense: 9 funds

There’s no any CPFIS-included unit trusts received a rating of “5” (Lipper Leader) in all four metrics.

6.2 Lipper Leader Rating for CPFIS-Included ILPs

Figure 7 Venn Diagram of CPFIS-Included ILPs With a Lipper Leader Rating (Rating of “5”)

Source: Thomson Reuters Lipper

As of the end of March 2016 the number of CPFIS-included ILPs in the top 20% of funds, receiving a rating of “5” and named Lipper Leaders, in each metric was as follows:

- Total Return: 29 funds
- Consistent Return: 30 funds
- Preservation: 44 funds
- Expense: 16 funds

Three of the CPFIS-included ILPs received a rating of “5” (Lipper Leader) in all four metrics combined. They are: Manulife Lifestyle Portfolios – Secure, NTUC Global Managed Fund (Balanced) and NTUC Global Managed Fund (Conservative).

Lipper Leader Rating Methodology

Unlike many competing quantitative measures, the strength of the Lipper Leader rating system is that it uses investor-centered criteria and not asset- or style/strategy-based criteria. These investor-centered criteria deliver clear, straightforward descriptions of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent, strong returns.

Investor-centered measures of fund performance and suitability

The Lipper Leader rating system consists of four metrics that provide clear, straightforward descriptions of a fund's success in meeting certain goals for constructing individualized portfolios.

 **Total Return**

 **Consistent Return**

 **Preservation**

 **Expense**

Determine whether you are investing in funds that fit your investment goals

Lipper Leaders provide context and perspective for making informed investment decisions but do not predict future performance. Funds are ranked against their Lipper peer group classifications each month for three-, five-, and ten-year periods and for the overall period. These ratings are based on an equal-weighted average of percentile ranks of the four Lipper Leader metrics.

For each metric:

-  The top 20% of funds receive a rating of "5" and are named **Lipper Leaders**.
-  The next 20% of funds receive a rating of "4."
-  The middle 20% of funds receive a rating of "3."
-  The next 20% of funds receive a rating of "2."
-  The lowest 20% of funds receive a rating of "1."

Lipper Leader Metrics

Total Return

The Lipper Leader rating for Total Return denotes a fund that has provided superior total return (income from dividends and interest as well as capital appreciation) compared to a group of similar funds. A Lipper Leader for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors the Total Return rating can be used with the Preservation and/or Consistent Return ratings to make an appropriate selection that balances risk and return.

Expense

The Lipper Leader rating for Expense identifies a fund that has successfully managed to keep its expenses low relative to its peers and within its load structure. A Lipper Leader for Expense may be the best fit for investors who want to minimize their total costs. This measure can be used in conjunction with Total Return or Consistent Return to identify funds with above-average performance and lower-than-average cost.

Consistent Return

The Lipper Leader rating for Consistent Return identifies a fund that has provided relatively superior consistency and risk-adjusted returns compared to a group of similar funds. Funds that achieve high ratings for Consistent Return may be the best fit for investors who value a fund's year-to-year consistency relative to other funds in a particular peer group.

Investors are cautioned that some peer groups are inherently more volatile than others, and even Lipper Leaders for Consistent Return in the most volatile groups may not be well suited to shorter-term goals or less risk-tolerant investors.

Preservation

The Lipper Leader rating for Preservation is for a fund that has demonstrated a superior ability to preserve capital in a variety of markets compared with other funds in its asset class.

Choosing a Lipper Leader for Preservation may help to minimize downside risk relative to other fund choices in the same asset class. Investors are cautioned that equity funds have historically been more volatile than mixed-equity or fixed income funds, and that even a Lipper Leader for Preservation in more volatile asset classes may not be well suited to shorter-term goals or less risk-tolerant investors.

7.2 Investment Terminology Definitions

Lipper Global Classification

The Lipper Global Classification (LGC) is the unique fund classification system developed by Lipper to assist fund information users in comparing fund performance within a reasonable peer group. Its purpose is to create homogeneous groups of funds with comparable investment objectives. We refine our existing classifications to ensure meaningful peer groups and add new classifications in response to client requests and market trends.

Quantitative Analysis

- **Return**

All returns are calculated on a NAV-to-NAV basis in Singapore dollars with dividends reinvested. The gain or loss of a particular fund in a particular period is calculated with the following formula:

Performance

$$\text{Percentage Growth} = \frac{\text{NAV}_t - \text{NAV}_{t-1}}{\text{NAV}_{t-1}}$$

For simple return:

$$\text{Performance Annualized} = (1 + \text{Percentage Growth})^{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units in Period}}} - 1$$

For log returns:

- **Return Relative to Benchmark**

$$\text{Performance Annualized} = \frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units in Period}} \times \text{Percentage Growth}$$

Relative return is a measure of fund performance relative to its benchmark's performance. It is calculated as the difference between the fund's return and the benchmark's return over a given period. Higher relative return means better fund performance relative to the benchmark's performance.

Formula:

$$\text{Relative Return} = \text{Fund Return} - \text{Benchmark Return}$$

For simple return:

$$\text{Relative Return Annualized} = (1 + \text{Relative Return})^{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units in Period}}} - 1$$

For log returns:

$$\text{Relative Return Annualized} = \frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units in Period}} \times \text{Relative Return}$$

▪ Expense Ratio

Expense ratio expresses the management, trustee, and certain other expenses of a managed fund as a proportion of the net asset value of the fund. The expense ratio expresses the sum of all operating expenses charged on an ongoing basis to the fund's assets as a percentage of the fund's average net asset value and is calculated using the following formula:

$$\text{Total Expense Ratio (\%)} = \frac{\text{Total Operating Expenses}}{\text{Average Net Asset Value}} \times 100$$

▪ Information Ratio

Information ratio is a risk-adjusted measure of a fund's performance relative to its benchmark's performance. (The fund's benchmark can be found in the supplementary document Return Performance Review.) The information ratio is given by the ratio of average relative return (excess return) and tracking error. Tracking error or tracking risk refers to the volatility or standard deviation of the investment manager's excess return over the benchmark's return. A higher information ratio means better fund performance relative to the benchmark's performance on a risk-adjusted basis.

Formula:

$$\text{Information Ratio} = \frac{\text{Average Relative Return}}{\text{Tracking Error}}$$

$$\text{Information Ratio Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Information Ratio}$$

▪ Sharpe Ratio

The Sharpe ratio is a risk-adjusted measure of performance developed by William F. Sharpe; it is also known as the reward-to-volatility ratio. It is calculated as the average subperiod excess return divided by the standard deviation of subperiod excess return over a given period. Subperiod excess return is the difference between the investment return and the CPFIS-OA guaranteed interest rate for a subperiod. A higher Sharpe ratio means better fund performance relative to the risk-free rate on a risk-adjusted basis. The Sharpe ratio is a special form of information ratio where the risk-free rate is the benchmark.

Formula:

$$\text{Sharpe Ratio} = \frac{\text{Average Sub Period Excess Return}}{\text{Standard Deviation of Sub Period Excess Returns}}$$

$$\text{Sharpe Ratio Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Sharpe Ratio}$$

▪ **Standard Deviation**

Standard deviation is a measure of investment risk or volatility in subperiod returns. It is calculated as the square root of variance, which is the average of the subperiod squared deviations over a given period. Higher standard deviation means higher risk.

Formula:

$$\text{Variance} = \frac{\sum (\text{Sub Period Returns} - \text{Average Return})^2}{\text{Number of Sub Periods} - 1}$$

$$\text{Standard Deviation} = \sqrt{\text{Variance}}$$

$$\text{Standard Deviation Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Standard Deviation}$$

▪ **Maximum Gain**

Maximum gain is the most positive monthly return over a given period.

Formula:

$$\text{Maximum Gain} = \text{Max (Positive Sub-Period Returns)}$$

▪ **Maximum Loss**

Maximum loss is the most negative monthly return over a given period.

Formula:

$$\text{Maximum Loss} = \text{Min (Negative Sub-Period Returns)}$$

▪ **Return/Risk**

The return/risk ratio is a measure of risk-adjusted performance. It is calculated as the average return divided by the standard deviation of subperiod returns over a given period. A higher return/risk ratio means better fund performance relative to fund volatility on a risk-adjusted basis.

Formula:

$$\text{Return to Risk} = \frac{\text{Average Return}}{\text{Standard Deviation}}$$

$$\text{Return to Risk Annualized} = \sqrt{\frac{\text{Number of Time Units Per Year}}{\text{Number of Time Units Per Sub Period}}} \times \text{Return to Risk}$$
