[Yielding to temptation](#)

In terms of Asian economic power, the past year has been transformative. Though the West has been ceding global economic power wholesale to Asia since the global financial crisis, the capital flows heading East over the past 24 months, and last 12 in particular, have brought about a level of economic development and financial integration that is extraordinary.

Global ETFs and ETPs have reached an annual compounded growth rate of 26.5% over the last ten years, and are up 12.9% year-to-date (YTD) with US\$132 billion of net new assets, according to the ETFGI monthly Insight report reviewing end of July 2012 data.

High Yield Bonds & High Dividend Equities

[All that junk](#)

Party in full swing; fundamentals slipping out of focus

The Asian high-yield bonds theme is proving to be one of the biggest financial stories of the post-financial crisis era, excluding regulation. Having suffered a low-yield global environment for years, the emergence of this lush oasis has put colour back on the cheeks of institutional fund managers worldwide – particularly those pension and insurance fund managers crippled by negative spread issues.
