[Looking worldly, feeling woolly](#)

One of the best things to argue about in finance these days is macroeconomic research. Must we rely on economists to guide us through the socio-economic assault course before we reach an investment decision or should we stick steadfastly to trusted ratios and rid our minds of such fuzz?

Macroeconomic research is vitally important, yet maddeningly problematic

It is incongruous that, just as governments around the world lurch to the left, becoming heavily involved in governing financial markets, macroeconomic research – which studies the impact of significant actions and major trends in the political and economic spheres – is having a seizure.

As per the new Guidance on Direct Marketing issued by the Office of the Privacy Commissioner for Personal Data in Hong Kong which has taken effect on 1st of April, 2013, we would like to inform you that we intend to continue to send promotional emails, such as newsletter, new promotion and products update to you by email.
